

CARDBOARD CHALLENGE 2024

All donations will be used in the Cardboard Challenge during our annual S.M.A.C.K. Night (Science & Math Activities Connecting Kids) to be held on Wednesday, October 16th.

Please visit airbasek8.net for further details!

- We need all sizes and types of boxes.
- Paper towel rolls too.
- All cardboard items should be clean and dry.
- Please break down larger boxes to a flat form.
- Bring smaller boxes and items together when you fill a large garbage bag. Bring items to the main office labeled Cardboard Challenge.

We are also in need of masking tape and boxcutters!

This highly engaging activity provides students the opportunity to apply math, science, language arts and their critical thinking skills to design and build an amazing creation out of cardboard!
